

Customer Intake Record — Fabrikam Wiki

SAML 2.0 SSO | SCIM User + Group Provisioning | Port 5011

General Information

Field	Value
Customer Name	Fabrikam Wiki
Application Name	Fabrikam Wiki
Date of Request	2026-04-27
Requested By	IAM Onboarding Team
Priority	Standard

SSO Configuration

Field	Value
SSO Protocol	SAML 2.0
SP Entity ID	http://localhost:5011/saml/metadata
ACS URL / Reply URL	http://localhost:5011/saml/acs
Sign-on URL	http://localhost:5011/login
SP Metadata URL	http://localhost:5011/saml/metadata
NameID Format	persistent
NameID Source Attribute	user.objectid

Persistent NameID (user.objectid) ensures a stable identifier if email changes. Contrasts with Contoso's emailAddress NameID.

Required Claims / Attributes

Entra Source Attribute	Claim Name
user.givenname	givenName
user.surname	surname
user.mail	emailaddress
Security groups (Group ID)	groups

Group Claims

Field	Value
Group Claim Required	Yes
Group Claim Source	Security groups
Group Claim Format	Group ID
Group-to-Role Mapping	Group membership determines access level

SCIM Provisioning

Field	Value
SCIM Provisioning Required	Yes
SCIM Connector Type	On-premises SCIM app (via provisioning agent)
SCIM Tenant URL	https://localhost:5011/scim/v2
SCIM Authentication	Bearer token
Secret Token	(configured in config-fabrikam.yaml)

SCIM Attribute Mapping Scope

Entra Source Attribute	SCIM Target Attribute
userPrincipalName	userName
mail	emails[type eq "work"].value
givenName	name.givenName
surname	name.familyName
Join(" ", [givenName], [surname])	displayName
department	enterprise:2.0:User:department
jobTitle	title

Expression-based mapping: displayName uses Join() to concatenate first and last name.

Matching attribute: userPrincipalName -> userName

Group Provisioning

Field	Value
Group Provisioning Needed	Yes
Group Attribute Mappings	displayName->displayName, objectId->externalId, members->members

Deprovisioning Behavior

Field	Value
When user is unassigned	Disable + remove group membership
When user is deleted	Hard delete (SCIM DELETE)

Stricter than Contoso: includes group membership removal on unassignment.

Notes

Flask SCIM 2.0 + SAML SP on port 5011 with groups_enabled: true.

Most complex provisioning scenario: users and groups both in scope.

Data in fabrikam.db, dashboard at /dashboard.
